

## Additional AI Tools For Job Seekers

<p><u><b>Jobscan:</b></u></p> 	<p>Jobscan is an AI-powered tool that helps job seekers optimize their resumes and cover letters for applicant tracking systems (ATS). It analyzes job descriptions and matches them to a candidate's resume to ensure they have the right keywords and skills. It is a tool that compares your resume against a job posting and provides a report on how well your resume matches the job description. It also suggests keywords and phrases to optimize your resume</p>
<p><u><b>Rezi:</b></u></p> 	<p>It is an AI-powered resume builder that uses natural language processing (NLP) and machine learning to help you create a tailored and optimized resume. Rezi tailors your resume for the job you want, getting your CV past a company's hiring system and into the right (human) hands. Just paste the job description for the role you're targeting and the tool will tell you exactly which keywords to use by comparing your resume to the job posting.</p>
<p><u><b>VMock:</b></u></p> 	<p>VMock is an AI-powered virtual career coach that helps job seekers improve their resumes. It provides instant feedback on the content and structure of a resume, highlighting areas for improvement and suggesting personalized recommendations for enhancement.</p>
<p><u><b>Zety:</b></u></p> 	<p>Zety is an AI-powered resume builder that helps job seekers create customized, professional-looking resumes. It uses machine learning algorithms to analyze the content and structure of a resume, providing feedback on areas that need improvement and suggestions for enhancing the overall quality. It is a resume builder that uses AI to suggest the best content for your resume and optimize its formatting.</p>
<p><u><b>Resumegenius:</b></u></p> 	<p>Resume Genius is an online resume builder, career resource website, and cover letter builder for job seekers. Resume Genius streamlines the job application process through an automated cover letter and resume building</p>
